

The **CROW Workshop Series** is designed to offer free professional development opportunities to teacher-scholars. These hands-on workshops will be held on Zoom, making them accessible to people across the globe.

Workshop 01

Corpus Data Scraping and Sentiment Analysis

In this workshop, we will scrape Amazon for reviews using the *rvest* R package to build a corpus of product reviews. We will then do some sentiment analysis from a critical perspective.

Presenter: Adriana Picoral, PhD

When? November 7, 10am to 12pm (Arizona Time/MST)

What to do to prepare for the workshop?

1. Download and install the **latest** R version from <https://cran.r-project.org>
2. Download and install the **latest** RStudio from <https://rstudio.com/products/rstudio/download/#download>

How to register: <http://bit.ly/crow-workshop-01>

We welcome to this workshop corpus linguists that are not yet familiar with R but interested in expanding their coding skills.
