The **CROW Workshop Series** is designed to offer free professional development opportunities to teacher-scholars. These hands-on workshops will be held on Zoom, making them accessible to people across the globe.

Workshop 04
Quantitative Language Data Analysis and Visualization in R

In this workshop, we will work with the **Variable that** data from Tagliamonte's book "Variationist Sociolinguistics" (2012). We will visualize frequency of *that* complementizer omission across speaker groups, and run both linear and logistic regression. Concepts such as correlation, interaction, and contrasts will be addressed.

Presenter: Adriana Picoral, PhD

When? April 17, 2021, 9am to 11am (Arizona Time/MST)
When is this in your time zone: http://bit.ly/when-is-crow-04

What to do to prepare for the workshop?
1. Download and install the **latest** R version from
   https://cran.r-project.org
2. Download and install the **latest** RStudio from
   https://rstudio.com/products/rstudio/download/#download

How to register: http://bit.ly/crow-workshop-04

We welcome to this workshop corpus linguists that are not yet familiar with R but interested in expanding their coding skills.
